(54) Title: A METHOD TO MAKE A PEPTIDE-CARRIER CONJUGATE WITH A HIGH IMMUNOGENICITY

(57) Abstract: The present invention provides a method for making a peptide-carrier conjugate. The method comprises modifying a first peptide to produce a second peptide so that the pI of the second peptide is in a favorable range or closer to the range than the pI of the first peptide, and conjugating a plurality of the second peptide to OMPC to obtain a peptide-carrier conjugate. The peptide load, or the solubility of the conjugate, or both of them are increased by the modification.
